

OMC Consultation Criteria

Once again, TOHAMO is partnering with the Ottawa Hospital Research Institute (OHRI) by offering access to Ottawa Methods Centre (OMC) Services to those TOHAMO physicians planning to submit an Innovation Fund 2017-18 proposal. If your project includes the collection and use of data, then a consultation is mandatory with the OMC prior to submission of your proposal to TOHAMO. Exemption: If the project proposal includes an applicant who is an OHRI scientist then a consultation is not required.

In order to access services, please complete the OMC - TOHAMO Consultation Request Form that can be found online at:

http://www.ohri.ca/programs/clinical_epidemiology/MethodsCentre/TOHAMO/ConsultationRequestForm.aspx

TOHAMO projects will be given priority consultation services by OMC; however, please schedule your appointment by no later than Monday, September 18, 2017. Requests will be triaged on a first come, first serve basis. Please note that submissions that have not undergone a Methods Centre consultation prior to October 16, 2017 will be rejected.
